-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

The Applicant has failed to particularly point out the support in the original disclosure for newly presented claim 12 (MPEP. §§ 714.02 and 2163.06) and must do so in response to the present Office action.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8, 11, and 12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Cumming, US 6,051,024. In the embodiment of Figure 15, each connecting structure is viewed as the elongate portion extending between the lens and the knob or protuberance **110** nearest the lens, with each haptic being interpreted as the elongate portion extending beyond said element **110**. Said anti-dislocation knob or protuberance **110** thus extends from at least the connecting structure (column 7, lines 13-16; column 6, lines 31-36) and is operable to inhibit dislocation of the lens from the capsular bag (column 7, lines 16-18; column 6, lines 36-41; column 2, line 10 et seq.). The embodiments of Figures 22 and 26 are likewise applicable to the instant claims, with the slot-shaped openings **138** or **154** defining the boundary between the connecting structure and the haptic. Regarding claim 3, the anti-dislocation elements are tilted with respect to a lens plane after implantation (column 2, lines 21-32). Regarding claims 4 and 5, because of the flexible nature of the filament type haptic structure (column 4, lines 1-2), the anti-dislocation elements are flexibly attached to the lens, especially in comparison with the disc or plate type embodiments of Figures 22 and 26, in which the anti-dislocation elements are relatively rigidly attached to the connecting structure. Regarding claims 6, 8, and 12, under an

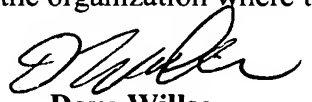

alternative interpretation, an opposite pair of elements **152** (Figure 26) corresponds to the claimed haptic or haptics, with the other pair of opposite elements **152** being equated with anti-dislocation elements extending from the lens.

The Applicant's remarks have been considered and are adequately addressed in the grounds of rejection presented above.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dave Willse whose telephone number is 571-272-4762 and who is generally available Monday through Thursday and often on Friday. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott, can be reached on 571-272-4754.
